

RFA - RFE - RFF

Feeder cable

50 ohm
Indoor / outdoor

50 ohm feeder cable. Designed to transmit signal power between the transmission equipment and the antenna even in most demanding environmental conditions and thus meet the highest technical and environmental standards. The cables are halogen free and non corrosive. Available in standard polyethylene jacket and in fire retardant, low smoke emission jacket in black (BHF) or grey (GHF). Superflexible RFF cables and extraflexible RFE cables offer the most convenient solution for installations in places where limited space requires small bending radius.

CONSTRUCTION

Rev.2.

| | | |
|------------------------|--|--------------------------------------------------------------------|
| Inner conductor | | Copper tube, corrugated copper tube or copper-clad aluminium wire. |
| Insulation | | Cellular polyethylene |
| Outer conductor | | Corrugated copper tube |
| Outer sheath | | Polyethylene or halogen free fire retardant thermoplastic |
| Marking | | Printed on outer sheath |
| Colour | | Black or grey |
| Mode of packing | | Drum |
