

FTTH indoor subscriber cable

1 BendBright^{XS} fibre, ES9, aramid yarns and LSZH sheath

EN 50 173-1

IEC 60794-2-20

Application

The intended application is as FTTH subscriber cable for indoor visible installation.

The cable may be used for outdoor visible installation, as the cable sheath is weather resistant and UV resistant. The cable may be blown into micro tubes, for a short distance between telecom closet and subscriber.
